

Cardiology Science Lunch Berlin

an exchange of insights and ideas in cardiovascular medicine

~ since 2015 ~

Calcineurin

– a Target in the Treatment of Cardiac Remodeling ?

Prof. Dr. Oliver Ritter

**Director of the Clinic of Cardiology and Pulmonology
Klinikum Brandenburg**

The calcineurin/NFAT pathway is crucial in the development of myocardial hypertrophy. Prof Ritter gives an overview on details of this pathway, the cytosolic and core function of calcineurin and some translational approaches for future therapies using novel calcineurin inhibitors.

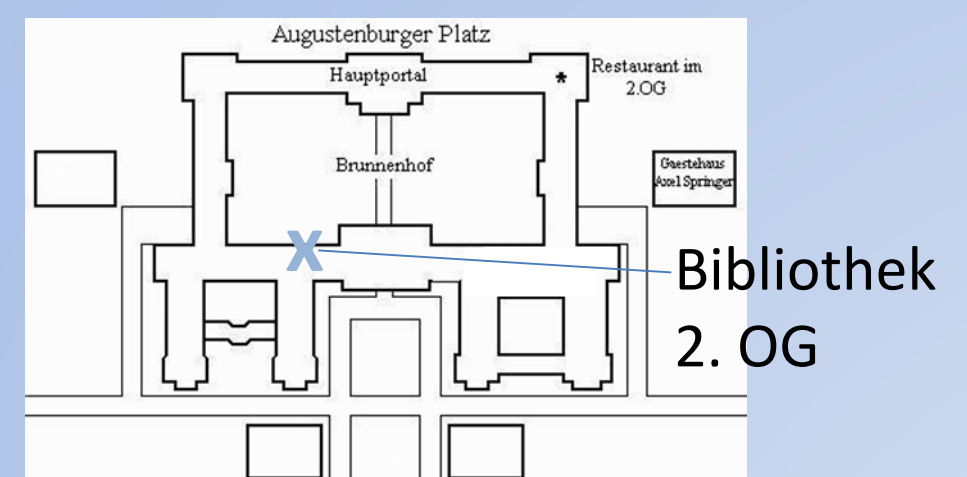

Following the results from basic research Prof Ritter and his group developed new calcineurin inhibitors and founded a company for drug development in this field.

Wednesday, 20.06.2018

12:00 – 13:00h

Bibliothek at DHZB

Augustenburger Platz 1, Berlin

The Cardiology Science Lunch Team

from the Department of Cardiology, Charité Universitätsmedizin, Campus Virchow-Klinikum, Berlin
and the Department of Medicine/Cardiology, Deutsches Herzzentrum Berlin

Prof. Dr. med. Frank R. Heinzel, Ph.D.

Dr. Paulina Wakula, Ph.D.

Christina Gaulhofer, BSc. MSc.

Prof. Dr. med. Philipp Stawowy

Univ. Prof. Dr. med. Burkert Pieske
