The Power of Metabolomics in Cardiovascular Research

Dr. Nicolas Schauer
Co-CEO|CSO, Biocrates Life Sciences AG, Innsbruck, Österreich

The analysis of hundreds of metabolites, metabolomics, has wide application areas in fundamental and applied research. In this seminar, we will provide an overview of the technology and its applications in the field of cardiovascular diseases, its causes through lifestyle and diet. We provide further insights into biomarker applications for disease and heart failure prediction and diagnosis.

Wednesday, 20.11.2019
12:00 – 13:00h

Bibliothek at DHZB
Augustenburger Platz 1, Berlin
