

BI - LECTURES 2009

CENTER FOR
CARDIOVASCULAR
RESearch

Charité -
Universitätsmedizin Berlin

Veranstaltungsort: CCR, Hessische Str. 3 - 4, 10115 Berlin, Seminarraum IV (Sky Room), Ebene 5
Beginn: 17.30 Uhr

- | | | |
|-------------------|---|--|
| 25.03.2009 | Christoph Wanner Department of Nephrology, University of Würzburg, Würzburg | Decreasing the burden of cardiovascular diseases in chronic kidney disease: How are we doing? |
| 08.04.2009 | Stefan Engelhardt Institute of Pharmacology and Toxicology, Technische Universität München, München | Novel signaling pathways in myocardial disease |
| 15.04.2009 | Jerzy Adamski Institute for Experimental Genetics, Genome Analysis Centre, University of Munich, Munich | Pathway analysis of cardiovascular diseases through metabolomics |
| 22.04.2009 | Rudolf Zechner Institute of Molecular Biosciences, University of Graz, Graz, Austria | Lipolysis: Mechanisms and metabolic consequences |
| 06.05.2009 | Stéphanie Lehoux Cardiovascular Cardiology Unit, Jewish General Hospital, McGill University, Montréal, Canada | New concepts on the protective effects of shear stress |
| 13.05.2009 | Donald Heistad Carver College of Medicine and VA Medical Center Iowa City, University of Iowa, Iowa City, USA | Update in vascular gene therapy |
| 20.05.2009 | Harold Dvorak Department of Pathology, Harvard Medical School, Boston, USA | Update angiogenesis: From the discovery of VEGF to modern anti-angiogenesis therapies |
| 27.05.2009 | Norbert Frey Department of Cardiology and Angiology, University Hospital of Christian-Albrechts University, Kiel | Novel molecular pathways in cardiac hypertrophy |
| 03.06.2009 | James Faber Department of Cell and Molecular Physiology, University of North Carolina, Chapel Hill, USA | Impact of genetic background on stroke volume in transgenic mice |
| 23.09.2009 | Matthias Tschöp Department of Psychiatry and Medicine, Obesity Research Center, University of Cincinnati, Cincinnati, USA | Gut-brain communication in the control of lipid and glucose metabolism |
| 30.09.2009 | Nikolaus Rajewski Systems Biology of Gene Regulatory Elements Group, Max-Delbrück-Center, Berlin | The evolution of gene regulation by transcription factors and microRNAs |
| 07.10.2009 | Genevieve Nguyen INSERM Unit 36 and Collège de France, Paris, France | The (pro)renin receptor: How important is it in physiology and in pathology? |
| 21.10.2009 | Elizabeth Murphy Pulmonary and Vascular Medicine Branch, NHLBI, Bethesda, USA | Mechanisms of male-female differences in ischemia-reperfusion injury |
| 28.10.2009 | Dorothy Vatner Department of Cell Biology and Molecular Medicine Faculty, New Jersey Medical School, Newark, USA | Sex dependent cellular and molecular signalling mechanisms in the cardiovascular system |

CENTER FOR
