

German-Japanese Charite-Symposium: THE AGING SOCIETY (2hr)

Organizer Prof. Erich Knop

The aging society represent a challenge of growing importance for the health systems of developed countries, in Germany as well as in Asia and World-wide.

Following an overview of global developments in Medicine on the occasion of the upcoming World Health Summit in Berlin and the M8 process, the historical relationships between the medical systems of Germany and Japan are considered, that were an important foundation of the introduction of scientific medicine in Asia.

Later, recent German-Japanese research topics and projects for medical research, therapy and prevention are presented and discussed.

Target group: Doctors, Scientists, and Public Health Care Specialist

General Public

Time	Duration (Min.)	Function	Title	Name, last	Name, first	Degree	Organisation	Country
