**Transposition of Great Arteries  
 Old Story – New Aspects**

8<sup>th</sup> DHZB Lange Symposium

January 21/22, 2012, Berlin

dbb forum berlin  
 Friedrichstraße 169 – 170 • 10117 Berlin

Dear colleagues,

For early 2012 we would again like to invite you to our symposium in Berlin.

### The 8th DHZB Lange Symposium for Congenital Heart Disease

will take place on 21 and 22 January 2012 at the dbb forum berlin, Friedrichstr. 169/170, 10117 Berlin.

The coming symposium is devoted to all aspects of transposition of the great arteries. This is a congenital complex with many new aspects to be considered, especially regarding innovative operative techniques. We are repeatedly faced with diverse difficulties and needs.

Our symposium is designed to give an overview of the current standards and options in the treatment of transposition of the great arteries but also to discuss possible future developments and our visions concerning this topic. To this end, we have invited renowned international and national speakers who will join with us in presenting a programme that we believe will be both exciting and challenging.

The main topics will be:

- Anatomy / Physiology
- Simple and complex transposition of the great arteries
- Different operative techniques
- Specialized imaging and diagnostic procedures
- Quality of life and long-term problems

We are looking forward, with you, to an interesting symposium and hope that we will be able to welcome you in large numbers in January 2012.

Prof. Dr. F. Berger  
Director, Dept. of Congenital Heart Disease/Pediatric Cardiology, DHZB

PD Dr. N. Nagdyman  
Senior Physician  
Congress Organizer,  
DHZB

Dr. K. Weiss  
Senior Physician  
Congress Organizer,  
Charité

08:30 **Opening**  
09:00 **Welcome:** Felix Berger

#### I. Basics

Chair: N. Nagdyman / K. Weiss

09:05 **Morphogenetic considerations on transposition of the great arteries**  
A. C. Gittenberger-de Groot  
09:30 **Pathogenesis of TGA- genetics versus environment**  
S. Klaassen  
09:50 **Anatomy and morphology of transposition of great arteries - from simple to complex**  
S. Y. Ho  
10:20 **Development of surgery for transposition of the great arteries**  
V. Alexi-Meskishvili

10:50 **Break**

#### II. Simple TGA: Really simple?

Chair: V. Alexi-Meskishvili / H. Kuppe

11:15 **Controversies about Rashkind BAS**  
B. Opgen-Rhein  
11:40 **Senning and Mustard: Palliative or even more?**  
R. Prêtre  
12:05 **Anesthesiological management: CPB, Blood, Drugs**  
M. Redlin  
12:30 **The fate of the aortic root and PA bifurcation late after arterial switch OP**  
H.-H. Sievers

12:55 **Lunch**

#### III. Specific focus on ...

Chair: S. A. Qureshi / M. Gewillig

14:25 **Baffle leaks and venous obstructions**  
P. Ewert  
14:50 **Interventional options for secondary pulmonary stenosis**  
S. A. Qureshi  
15:15 **The coronaries at risk on long term?**  
S. Fratz  
15:40 **Pulmonary hypertension: A valid problem in TGA?**  
O. Miera

16:05 **Break**

#### IV. Complex transposition of the great arteries

Chair: V. Hraška / R. Prêtre

16:30 **Rastelli operation and their pitfalls**  
C. Stamm  
16:55 **Screening for corrective surgery**  
S. Ovrutskiy  
17:20 **Modern surgical concepts - miracle or reality?**  
M. Hübler  
17:45 **Double switch operation - everything is possible?**  
V. Hraška

18:10 **Reception**

#### V. Monitoring tools

Chair: M. Hübler / P. Ewert

09:00 **Prenatal diagnosis:**  
**Do we accurately detect transposition of the great arteries?**  
R. Chaoui  
09:25 **Echocardiography: Good enough?**  
M. Yigitbasi  
09:50 **MRI: Ventricular function and 4D**  
T. Kühne  
10:15 **Exercise capacity: Are olympic games realistic?**  
A. Hager

10:40 **Break**

#### VI. Quality of life

Chair: L. Schmitz / B. Peters

11:05 **Late outcome: Senning versus Switch**  
K. Weiss  
11:30 **Pregnancy in transposition of the great arteries**  
N. Nagdyman  
11:55 **Behavioral outcome after arterial switch operation**  
H. H. Hövels-Gürich  
12:20 **Psychosocial aspects in congenital heart disease with the focus on adulthood**  
K.-O. Dubowy

12:45 **Short Lunch**

#### VII. Long term problems

Chair: R. Hetzer / F. Berger

13:45 **Supraventricular tachycardia and ablation therapy**  
J. Hebe  
14:10 **Pacemaker, AICD and sudden cardiac death**  
J. C. Will  
14:35 **Non-surgical options for failure of the systemic ventricle**  
B. Peters  
15:00 **Failing Ventricles - Training, Retraining - modern concept or air bubble?**  
M. Gewillig  
15:25 **Transplantation in atrial switch and cc-TGA**  
R. Hetzer  
15:55 **Closing Remarks**  
F. Berger
