Left Heart under Pressure
9th DHZB Lange Symposium

January 19/20, 2013, Berlin

dbb forum berlin

Friedrichstraße 169 – 170 • 10117 Berlin

Dear colleagues,

For early 2013 we would again like to invite you to our symposium in Berlin.

The 9th DHZB Lange Symposium for Congenital Heart Disease

will take place on 19 and 20 January 2013 at the dbb forum berlin, Friedrichstr. 169/170, 10117 Berlin.

The upcoming symposium is devoted to all aspects of pressure load of the left heart caused by various congenital cardiac defects. With this symposium we want to highlight new aspects to be considered, with specific focus to innovative operative techniques and treatment modalities of this complex congenital heart disease, since we all are repeatedly faced with diverse difficulties and needs in our clinical management of these patients.

We want to either give an overview of the current standards and options in the treatment but also to discuss possible future developments and visions concerning this topic. To this end, we have invited renowned international and national speakers who will join with us in presenting a programme that we believe will be both exciting and challenging.

The main topics will be:

- Anatomy / Morphology
- Valvular Aortic Stenosis
- Subaortic Stenosis / Shone Complex / Mitral Stenosis
- Stenoses and Wall Anomalies of Ascending Aortae
- Aortic arch / Descending aorta
- Imaging – evidence vs. individualized judgement
- Prenatal / Specific Problems

We are looking forward, with you, to an interesting symposium and hope that we will be able to welcome you in large numbers in January 2013.

Prof. Dr. F. Berger
Director, Dept. of Congenital
Heart Disease/Pediatric
Cardiology, DHZB

Dr. S. Ovrutskiy
Senior Physician
Congress Organizer,
DHZB

PD Dr. L. Schmitz
Senior Physician
Congress Organizer,
Charité

08:30 Opening
09:00 Welcome: F. Berger

I. Anatomy / Morphology

Chair: R.H. Anderson / F. Berger

09:05 Morphological aspects of left ventricular pressure load
R.H. Anderson
09:30 Does hypertrophy obey Laplace?
P.P. Lunkenheimer
09:55 Embryology and fetal development
A.C. Gittenberger de Groot
10:20 Heredity of left heart obstructions: is family screening indicated?
S. Klaassen
10:45 Break

II. Valvular Aortic Stenosis

Chair: I. Dähnert / V. Hraška

11:10 Standards available??
I. Dähnert
11:15 Balloon valvuloplasty: quick but destructive?
P. Ewert
11:35 Aortoplasty and Reconstruction: efficiency guaranteed?
J. Photiadis
PRO / CON Session
11:55 Replacement: Stay on the left side
C. Stamm
12:15 Ross operation – a perfect solution?
H.-H. Sievers
12:35 Round table with all speakers
I. Dähnert
12:55 Lunch

III. Subaortic stenosis / Shone Complex / Mitral stenosis

Chair: R. Prêtre / R. Hetzer

14:25 Which kind of subaortic stenoses respond to resection alone?
R. Mair
14:50 Aortoventriculoplasty: indications and long term results
W. Ruschewski
15:15 Subaortic stenoses after repair: always avoidable?
R. Prêtre
15:40 Congenital mitral stenoses: how to deal with?
R. Hetzer
16:05 Break

IV. Stenoses and wall anomalies of ascending aortae

Chair: V. Alexi-Meskishvili / R. Mair

16:30 Bicuspid aortic valve and ascending aorta?
M.-Y. Cho
16:55 Williams Beuren syndrome: more than just supravalvular aortic stenosis
R. Pankau
17:20 Surgical techniques to address supravalvular aortic stenoses
V. Alexi-Meskishvili
17:45 Noonan and Turner: What is wrong with the aortic wall?
P.N. Robinson
18:10 Reception

V. Aortic arch / Descending Aorta

Chair: C. Schreiber / S. Ovrutskiy

PRO / CON Session

09:00 Classic coarctation: Do we still need a surgeon?
I. Dähnert
09:20 Classic coarctation: Why we still need a surgeon!
V. Hraška
09:40 Rebuttal (5 min each) – Common sense at the end
I. Dähnert / V. Hraška
09:55 Interrupted Aortic arch and aortic arch hypoplasia
C. Schreiber
10:20 Aneurysms and dissections: Interventional vascular surgery
B. Zipfel
10:45 Break

VI. Imaging – evidence vs. individualized judgement

Chair: L. Schmitz / T. Kühne

11:10 Echocardiography: precise enough?
H. Abdul-Khalik
11:35 MRI and CT: acute and follow up
T. Kühne
12:00 Diagnostic angiography: old or new technique?
S. Schubert
12:25 Stress testing and ECG
B. Peters
12:50 Lunch

VII. Prenatal / Specific problems

Chair: W. Henrich / N. Nagdyman

13:50 Aortic stenoses and coarctation: diagnostic accuracy
W. Henrich
14:15 Valvular aortic stenosis: Indications for and results of fetal interventions
G. Tulzer
14:40 LV and Arch interrelation with maternal hyperoxygenation – mystery or reality?
T. Kohl
15:05 Left heart obstruction and pregnancy
N. Nagdyman
15:30 Left heart obstructions and sports: Current recommendations
A. Hager
15:55 Closing remarks
F. Berger
